COMPUTER SCIENCE STUDENT

MALANA, GLYZZA MAE

Keep moving forward, one step at a time.

About Me

By Glyzza Mae Malana

Computer Science student at City College of Calamba who transitions naturally from code to active living. You'll often find me snapping gym selfies, participating in campus running events, enjoying quiet moments in aesthetic spots, or finding peace surrounded by nature.

MY GOALS & *Achievements*

**STRONG MIND,
STRONG BODY,
STRONG FOCUS.**

I balance my passion for technology with creative art and physical fitness. Winning champion in a school filmmaking competition reflects my love for storytelling, while participating in campus running events keeps me focused on my goal to complete a 5km run. Earning a medal in the PRG event during our Sportsfest proved that hard work and dedication bring real results. Whether I am coding, making films, or training on the track, I always strive to push my limits and grow.

Politics, Self-Care & Nature Trips

Life is all about balance - serving my community, staying strong, and finding peace in nature.

My Interests

Step into my world, where running for local leadership gives me the chance to make a real, positive impact in people's lives. To fuel that passion, I prioritize workout routines to build the energy and stamina needed to show up fully every day. And when it's time to recharge? You'll find me on a quiet nature trail, letting the green scenery clear my mind and restore my spirit.

Find quiet moments in a green world.
